

NexusIQ Corporation — Weekly Operations Digest

Week 48: November 25 – December 1, 2024 (Black Friday / Cyber Monday Week)

Prepared by: Operations Analytics | Distributed: Monday Dec 2, 2024 | Classification: Internal — Operations

Week Overview

Week 48 was the highest-revenue week in NexusIQ's operating history. Gross revenue of \$7,218,440 represents a 151% increase over the prior week (Week 47: \$2,874,320) and a 213% increase over the same week in 2023. The Black Friday promotional event on November 29 and Cyber Monday on December 2 (captured in the final hours of this reporting period) together drove approximately 62% of week revenue. The operations team executed the surge without a system outage, though two fulfillment centers experienced temporary processing delays on November 29 that were resolved within four hours.

Electronics was the dominant category, accounting for 71% of week revenue versus its standard 51.8% annual average. Laptop and Phone promotions drove the majority of Electronics demand. Headphone bundle attach rate reached 34% of Laptop transactions — well above the 18% annual average — driven by the \$349 Laptop+Headphones bundle promotion advertised in the Black Friday catalog.

Daily Revenue Summary — Week 48

Date	Day	Gross Revenue	Transaction Count	Avg Transaction Value	Highlight
Nov 25, 2024	Monday	\$748,210	1,421	\$526.53	Week-opening promotions live
Nov 26, 2024	Tuesday	\$612,340	1,182	\$518.05	Normal Tuesday volume
Nov 27, 2024	Wednesday	\$891,480	1,688	\$528.13	Pre-Thanksgiving electronics purchases
Nov 28, 2024	Thursday (Thanksgiving)	\$1,124,670	2,109	\$533.27	Thanksgiving deals — online only
Nov 29, 2024	Friday (Black Friday)	\$2,418,920	4,632	\$522.25	Black Friday — highest single-day event
Nov 30, 2024	Saturday	\$884,320	1,692	\$522.65	Post-BF continued deals
Dec 1, 2024	Sunday	\$538,500	1,041	\$517.29	Cyber Monday preview — partial day
Week 48 Total		\$7,218,440	13,765	\$524.40 avg	151% above prior week

Category Performance

Category	Week 48 Revenue	% of Week	Vs Prior Week	Vs Annual Avg Share	Key SKU
Electronics	\$5,125,092	71.0%	+218%	+19.2 pts vs 51.8%	Laptop (bundles)

Total	\$7,218,440	100%	+151%	—	—

Operations Issues and Inventory Alerts

Two fulfillment issues occurred during the week. The West region fulfillment center (W-FC) experienced a pick-and-pack queue backup on Black Friday morning, resulting in an estimated 847 orders delayed beyond the promised 2-hour processing window. The delay was resolved by 2:00 PM PT through temporary staff reallocation from the returns processing team. Customer communications were sent proactively to affected orders. The Central fulfillment center (C-FC) experienced a barcode scanner outage for approximately 90 minutes on November 27; no orders were lost but approximately 340 orders required manual entry during the outage.

Inventory alerts as of end of Week 48: 31 Electronics SKUs are now at or below reorder point, up from 24 at the start of the week. Laptop inventory at stores W014, W007, C003, and C011 fell below safety stock thresholds during the week. Emergency replenishment orders were placed for those four stores. Per the Inventory Reorder SOP, high-priority stores receive daily replenishment review until stock is restored. Restock is expected December 18-21 for the most affected stores.

Alert Type	Count	Primary Category	Action Taken	Expected Resolution
SKUs below reorder point	31	Electronics (22), Home (6), Other (3)	Emergency POs placed	Dec 18-21
Stores at critical stock	4 stores	Electronics — Laptop, Tablet	Emergency transfers	Dec 18-19
Pending return processing backlog	412 items	Electronics (248), Clothing (164)	Extra staff scheduled	Dec 5
Fulfillment delay complaints	184 tickets	All categories	Proactive comms sent	Closed

As of December 1, 2024 end of day. Inventory data from inventory table snapshot.

Customer Service Impact

Support case volume reached 94 new cases in Week 48 — the highest weekly count of FY 2024. The majority were related to order status inquiries during the Black Friday processing delay (41 cases) and delivery timeline questions (28 cases). Return initiation cases numbered 18, consistent with post-promotion return patterns. Support operated above staffed capacity on November 29; three Tier 2 escalations were required for cases involving customers who received incorrect items due to the fulfillment queue backup.
